Impeachment 7/31/74

There has to have been a conscious decision in the control of the House committee as there was an avoidance in the WG committee of the overt case of tax fraud going back to the contract itself, which was not mentioned in the debates. (Weicher did but inadequately).

There was never any meeting of the minimum conditions and the agreements were not signed by the government.

There was a conspiracy on this, involving both IRS and GSA. Other notes indicate basis.
